--SUMMARY OF THE INVENTION--

Page 2, after first full paragraph:

--The invention achieves this objective with a convertible vehicle in which, to connect the middle section to the mounting fixtures, fastening means are provided, which, when the roof is closed, are at least approximately parallel to the plane of the outer roof covering in the area of each bow ~~with the features of Claim 1 and with a movable vehicle roof with the features of Claim 10. Advantageous refinements of the invention are described in dependent Claims 2 to 9.~~

~~In the design of~~ accordance with the invention, the fastening devices, e.g., screws, bolts, rivets, or the like, do not extend beyond the bow. This increases head clearance and reduces the risk of injury.--
